

January 4th, 2010

To All Visual-ARMS Customers:

January 4th, 2010 – Edibar Systems, Inc. announced today they will “End-of-Life” their legacy software product Visual-Automated Release Management System (Visual-ARMS) single user version effective January 1st, 2011. End-of-Life means that the product will no longer be enhanced or supported after this date. Support for Visual-ARMS (Single User version) will be available for the immediate future to give our customers time to migrate to the new Edibar-Release Management System (Edibar-RMS). However, as new features, requirements, and improvements within the automotive community are mandated, Edibar Systems will evaluate whether these improvements will be added to the legacy system.

The new Microsoft Certified Edibar-Release Management System is the Next Generation product and includes numerous enhancements to better meet our customer's needs. Edibar-RMS has similar functionality to Visual-ARMS, presented in a cleaner, more user-friendly application.

Please contact your Edibar Account Manager at 800-633-3210 to begin the migration process to the new software. Full credit for the original purchase of Visual-ARMS's base system will be extended to all upgrades as well as all purchased trading partners.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Hemric", is written over a white background.

Ricky Hemric

Vice President of Operations
